

LITE BRITE

Metal Cleaner & Brightener

DESCRIPTION

This product is a low foaming metal cleaner and brightener. Unlike HF/ABF products that rapidly etch soft metals, this product has a very slow etch rate and thus reduces the chance for damage. Its low foaming profile helps deliver maximum acidity for cleaning with minimal surfactant interference. This product is extremely effective on welding slag.

USAGE INSTRUCTIONS

For maximum effectiveness in heavy duty cleaning applications apply at 1-10:1 (such as metal slag). For standard metal cleaning apply at 10-50:1. As always apply in a small spot inconspicuous spot before tackling the areas of concern.

FEATURES

- Low foaming
- Slow etching
- Effective on slag and welds
- HF and ABF free

SIZES AVAILABLE

5-gallon pails	Code: 11-55150-005
15-gallon drums	Code: 11-55150-015
30-gallon drums	Code: 11-55150-030
55-gallon drums	Code: 11-55150-055

SPECIFICATIONS

COLOR:	BLUE
FRAGRANCE:	NONE
FOAM:	WHITE
PH:	0-1
